

Atharva Rajendra Gade

Pune, India | atharvagadetechn@gmail.com | +91-9146890326 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Final-year Information Technology undergraduate with strong foundations in data structures, algorithms, and object-oriented design. Proficient in C++, Python, and Java, with hands-on experience building scalable backend systems, RESTful APIs, and database-driven applications. Experienced in SDLC practices, testing, debugging, and version control. Comfortable in agile environments delivering reliable, high-impact software systems.

Core Skills

- **Problem Solving:** Data Structures & Algorithms, Competitive Programming (LeetCode)
- **Engineering:** SDLC, code reviews, unit/integration testing, secure coding, architecture basics
- **DevOps & Cloud:** Git, CI/CD (GitHub Actions / Jenkins / Azure DevOps), Docker, AWS/Azure fundamentals
- **GenAI:** Prompt engineering, embeddings, vector DB (FAISS / Chroma / Pinecone)
- **Tech Stack:** C++, Python, Java, TypeScript, JavaScript, SQL, PHP — React, Node.js, FastAPI, Express.js — MongoDB, MySQL

Experience

Web Development Intern — CodTech IT Solutions

Jan 2022 – Feb 2022

- Delivered sprint-based enhancements across frontend and backend modules aligned with SDLC practices.
- Improved system reliability via debugging, performance tuning, and resolving runtime issues using logging and profiling.

Selected Projects

Cloud Cuisine — Full-Stack Cloud Kitchen Platform

TypeScript, Node.js, React, MongoDB, REST APIs

- Architected full-stack cloud kitchen ordering platform with end-to-end flow from menu browsing to order confirmation.
- Designed RESTful API backend with TypeScript ensuring type-safe data models, request validation, and structured error handling.
- Implemented user authentication, session management, and role-based access control for customers and kitchen admins.
- Built responsive React frontend with real-time order status updates and seamless database-driven menu management.

Online Voting System — Secure E-Voting Platform

PHP, MySQL, Authentication, Admin Dashboard

- Developed secure voting platform with encrypted ballot submission and tamper-proof result tallying mechanisms.
- Implemented multi-layer authentication with session-based login, voter verification, and admin role separation.
- Designed normalized MySQL schema supporting elections, candidates, voters, and audit logs with referential integrity.
- Built admin dashboard for real-time vote monitoring, candidate management, and election lifecycle control.

AI Interview Assistant — LLM-Powered Full-Stack Interview Platform

React, Node.js, Express, LLM APIs

- Engineered full-stack interview platform integrating LLM APIs for real-time, context-aware question generation.
- Architected RESTful Express backend handling streamed LLM responses with sub-second latency at scale.
- Built dynamic React UI rendering AI-generated feedback, scoring, and follow-up questions in real time.
- Designed modular prompt engineering layer supporting role-specific interview tracks across multiple domains.

Secure Shield — Enterprise WordPress Security Plugin

PHP, OOP Architecture, Security Hardening

- Developed enterprise-grade WordPress security plugin using clean OOP design patterns for maintainability and extensibility.
- Implemented file integrity monitoring, brute-force protection, and malicious request filtering at the application layer.
- Engineered automated security audit checks surfacing vulnerabilities and misconfigurations via admin dashboard alerts.

Education

B.E. Information Technology — PES's Modern College of Engineering, Pune

2022 – 2026

Certifications

- **Cloud & AI:** AWS Cloud Practitioner — Microsoft AZ-900 (Azure Fundamentals) — AI-900 (Azure AI Fundamentals)
- **Data Science & ML:** Machine Learning — Andrew Ng, Coursera — Python for Data Science — NPTEL — Kaggle Data Science
- **Other:** Generative AI Fundamentals — PSM-I (Professional Scrum Master)
